A Note from Our Founder

Welcome to the StayFi community! Our mission is to empower every short-term rental operator with the technology to achieve a vibrant, independent, and more profitable brand. Please don't hesitate to reach out to support@stayfi.com if you have any questions about how to make the most of StayFi.

- Arthur Colker, CEO

Bundle Components

Installation Notes

Each property requires a full bundle consisting of:

1. Aginet Device

- At least one device labeled as **"Main!"**
- Each Aginet device includes the required power supply and Ethernet cable inside the box.

2. StayFi Express

- StayFi Express Device.
- Power supply.
- Ethernet Cable.

Optional

- For larger properties, your bundle might include additional Aginet devices labeled "Extenders".

You cannot mix-and-match StayFi Express and Aginet devices labeled for different properties. Ensure all the devices you bring to a property are labeled accordingly.

1. Aginet Device

2a. StayFi Express.

2.b

1 Power Supply

2c.

1 Ethernet Cable

Main Aginet Device Installation

Your router or modem

Connect the WAN/LAN port of your Main Aginet device to your property's main router or modem.

Main Aginet Device

Plug your Main Aginet device and your StayFi Express into the power.

StayFi Express

Do **not** pinhole reset your devices. Do **not** manage your devices through the Aginet App. Please contact support@stayfi.com with questions.

Wireless Extender Aginet Installation

Disclaimer: Complete the installation of your Main Aginet device before you proceed to install any extenders.

Plug your Extender Aginet device into the power. No Ethernet cables are required for the extender.

INSTALLATION TIPS

- Place your extender approximately halfway between the Main Aginet device and the area of the property with a poor signal.
- Place your device at least 3-5 feet off the ground. Avoid placing it inside closed cabinets or behind metal structures.
- You can check the signal strength that an extender device is receiving in your StayFi account. Go to the Access Points page, Activate and Assign the bundle to see the signal strength. If the signal strength is showing as a yellow warning, try moving the extender closer to the Main device to improve the wireless connection.

Do **not** pinhole reset your devices. Do **not** manage your devices through the Aginet App. Please contact support@stayfi.com with questions.

Access Point Assignment

Log in to your StayFi account, go to the [Access Points](#) page, and [Activate](#) and [Assign](#) your equipment to the desired property.

The screenshot displays the StayFi dashboard with a sidebar on the left containing various navigation options. The 'Access Points' option is circled in red. The main content area is titled 'Access Points' and includes a 'Set Up Offline Alerts' button. Below this, there is a section for 'Unassigned Access Points' with a table. The table has two columns: 'DEVICE' and 'STATUS'. A single row is visible for a 'StayFi Express' device with MAC address 'ac:8b:a9:14:07:a9', showing a status of 'All Connected' and an 'Activate' button. Below the table is a section for 'Assigned Access Points'.

DEVICE	STATUS
StayFi Express ac:8b:a9:14:07:a9 StayFi Express 3 Devices 2 Wired / 1 Wireless	All Connected Activate

Do not pinhole reset your devices.
Please contact support@stayfi.com with questions.
