A Note from Our Founder

Welcome to the StayFi community! Our mission is to empower every short-term rental operator with the technology to achieve a vibrant, independent, and more profitable brand. Please don't hesitate to reach out to support@stayfi.com if you have any questions about how to make the most of StayFi.

- Arthur Colker, CEO

Getting Ready for the Installation

Ensure you have all the components

If any components are missing, please contact support@stayfi.com for assistance.

1.

1 StayFi Express

2.

1 Power Supply

3.

1 Ethernet Cable

Ensure you have at least one free port in your mesh system

You will need at least one free ethernet port available in the main router of your mesh system.

If you don't have any ports available, you can get a switch.

We recommend this one: <https://bit.ly/switch-fi>

Installing Your StayFi Express

Install your StayFi Express on your own

If you're planning to use StayFi Express with an **Amazon eero** or a **TP-Link Deco** network, you can complete the setup yourself without a call. Just log in to your StayFi portal, go to the **Access Points** page, and click **Configure** next to the StayFi Express device.

Schedule a call with our team to complete the installation

If you're planning to use your StayFi Express with any other compatible mesh system, schedule an installation call at: <https://bit.ly/stayfi-express>

Or scan the QR code on this page.

For a successful installation, make sure you schedule a time when:

- You will be physically at the property.
- You will have your StayFi Express device with you.
- You will have access to change the settings in your mesh network (typically done through the eero or Deco app on your phone).

Earn More With StayFi

Affiliate & Testimonial Program

Join Our Affiliate Program

And earn 20% of monthly subscription revenue!

Our affiliates enjoy 20% of the recurring revenue from their referrals for 12 months and receive a unique promo code for 50% Off their referrals first 3 months with StayFi.
